

AI Academy Overview and Training Proposal

Practical AI seminars and hands-on workshops for Filipino teams · October 2026

About the program

Grateful Prints AI Academy is the AI seminars and training service of Grateful Prints. It helps print shops, government offices, local businesses, schools and Filipino professionals use AI practically and responsibly to work smarter, improve productivity and grow with technology.

We don't just teach AI tools. We demonstrate how AI and digital systems can be applied to real Filipino businesses.

Core mission: we build people first, and people build the business. We collaborate, not compete.

Programs

A. AI for Print Shops

Use AI in the everyday work of a printing business: design ideas, quotations, promotions, customer replies and production planning.

Participants: Print shop owners, designers, front-desk staff and production leads. Duration: Half-day to full-day; two-day bootcamp available.

Topics: AI-assisted design ideation, Print product marketing and promotional content, Customer inquiries and quotation drafting, Product descriptions and sales messaging, Production planning and order management, AI promotional images and short videos, Customer support replies and business reporting, GP OS workflows and a 3D shop operations demonstration (optional, Level 3).

B. AI for LGUs & Government

Responsible, practical AI for administrative work, with human verification, accountability and data privacy at the centre.

Participants: LGU and government office staff, supervisors and department heads. Duration: Awareness seminar, half-day, full-day or two-day program.

Topics: AI fundamentals, Prompt engineering, Administrative reports, Government correspondence, Meeting summaries, Presentations, Spreadsheet productivity, Public service communication, Data privacy and responsible AI (RA 10173 awareness), Human verification and accountability, Digital transformation planning for the office.

C. AI for Local Businesses & MSMEs

Practical AI for marketing, selling and running a small business, using free or low-cost tools.

Participants: Business owners, sellers, marketing and admin staff of small businesses. Duration: Half-day to full-day.

Topics: Everyday business productivity, Marketing, Facebook content and advertising preparation, Sales assistance and product descriptions, Customer communication, Content creation (posts, images, short videos), Business planning, inventory and basic analytics, Simple workflow automation.

D. AI for Schools & Educators

Responsible AI literacy for educators: lesson preparation, research assistance and presentations, with academic integrity in focus.

Participants: Teachers, school administrators and academic staff. Duration: Awareness seminar to full-day.

Topics: Responsible AI literacy, Research assistance and source checking, Lesson preparation, Presentations, Educational workflows, Academic integrity and AI use policies.

E. AI for Designers, Creatives & Freelancers

AI-assisted ideation and production for creative work, with clear guidance on intellectual property and original work.

Participants: Graphic designers, crafters, content creators, freelancers and online sellers. Duration: Half-day to full-day.

Topics: AI-assisted design ideation, Image and video workflows, Creative production, Productivity for freelancers, Responsible use of intellectual property.

F. Custom Corporate & Community Training

A curriculum built around your industry, your team and your training goals.

Participants: Companies, cooperatives, NGOs and community organizations. Duration: Flexible, by agreement.

Topics: Needs assessment with your organization, Industry-specific use cases, Hands-on exercises with your real workflows (using non-sensitive samples), Responsible AI and data privacy.

Learning path

Level 1: Learn AI

The basics, for complete beginners. Basic AI and generative AI, Prompting, Everyday productivity, Safety and responsible use.

Level 2: Apply AI

Use AI on the real work of your team. Design and marketing, Quotations, reports and presentations, Customer support, Creative production, Workflow automation.

Level 3: Build Smarter Systems

See how AI and digital systems run a real business. Digital transformation planning, AI-assisted system development, GP OS and 3D Virtual Office examples, Dashboards and operations, Human oversight. Optional and advanced. Beginners never need 3D or system-building skills.

These are academy-defined levels, not an official accreditation classification.

Training formats

- Online AI seminars: Live sessions over video call for teams in any location.
- Onsite workshops: In your office, school, venue or print shop.
- Half-day training: About 4 hours: core skills and one hands-on module.
- Full-day masterclass: About 8 hours: deeper practice across several modules.
- Two-day bootcamp: Two full days with guided projects and a team workflow plan.
- Customized programs: A series or curriculum built for your organization.

What every participant receives

- Session slides and a practical prompt guide
- Ready-to-use templates for the exercises covered
- Certificate of attendance issued by Grateful Prints

Participant requirements

- A laptop or smartphone with a modern web browser
- Internet access for hands-on activities (onsite venues: shared Wi-Fi)
- A free account on the AI tools used in class; no paid subscription required

Training packages

Package	Indicative starting fee	Delivery	Includes
AI Discovery Seminar	Starts at ₱8,500	2 hours, up to 40 participants	What AI can and cannot do; Live demonstrations; Safe and responsible use; Printed certificates of attendance

Indicative starting fees, subject to final quotation. Fees depend on the number of participants, location, customization, materials, travel, applicable taxes and the final scope.

Why train with us

- Filipino-friendly explanations: Clear, practical lessons with local examples.
- English, Tagalog, Taglish or Bisaya-English: Choose the language that fits your team.
- Beginner-friendly: No technical background needed.
- Hands-on activities: Participants practise on real-world tasks, not just slides.
- Industry-specific: Examples for print shops, offices, schools and small businesses.
- Practical templates: Take home prompts and templates you can use the next day.

- Responsible AI: Data privacy, verification and accountability in every session.
- Human-centered learning: We build people first, and people build the business.

Resource speaker

Neil Saldia, Founder, Grateful Prints · AI Training & Digital Productivity Practitioner · Designer and Entrepreneur

Neil Saldia is the founder of Grateful Prints, the Iligan City-based printing ecosystem that connects customers with print shops, designers, crafters and riders. He designs, builds and runs the Grateful Prints platform and its business operations himself.

His work spans creative design and digital business operations. He uses AI-assisted tools every day to design, write, plan, support customers and build software, and he teaches those same workflows in plain, practical language.

Next steps

- Send your request through the booking form at gratefulprintsph.com/ai-training or email business@gratefulprintsph.com.
- We confirm your goals, participant count, date, venue and language.
- We send a final proposal and quotation for your approval.
- Training is delivered online or onsite; certificates of attendance are issued after the session.

Sample exercises use fictional data. Certificates of attendance are issued by Grateful Prints and are not government or academic accreditation.
